# MARC ILUNGA

WEB DEVELOPER

PROFILE

I'm a fullstack Developer with more than 4 Years experience of website development, design and database experience. I have built various websites and applications using different languages and platforms.

I'm creative with high level of problem solving, over the years i have been developing, my passion for programming has grown more and more and I'm hungry for more. I learn every day and through challenges I learn even more. I went to DUT (Durban University of Technology) Where I did study Information Technology for Two Years . Through some Youtube Channels, online courses, developers meetups I have gained more practical knwologde. Most of my skills I have gained along the years are self-taught
